

## 805PT Pressure Transmitter Dual Seal Approved

### New Option

SOR® has added another feature option to their currently successful 805PT transmitter family. The standard built-in conduit seal plus all welded design allows for easy dual seal approval, ANSI/ISA 12.27.01.

Dual seal approval assures process cannot enter a conduit system through the 805PT transmitter. Also, it meets the visual verification requirements.

The 805PT has proven it solves applications where simple continuous monitoring is preferred, space is limited, low cost of ownership is valued, and safety is more than a statement.

The 805PT transmitter carries a 3-year warranty and fits the SOR quick delivery model.

### Features

- Built-in conduit seal
- 0.25% accuracy
- 4-20mA or 1-5 VDC output (loop powered)
- Explosion Proof, NEMA 4X, IP 66 housing
- Cast 316 stainless steel housing (non-tubular construction)
- Meets Canadian CEC 2009
