

Multipoint Temperature Sensors

Multipoint Sensors are typically used in applications where there is a need for temperature profiling at various points over distance. We can help you problem solve your application and custom design and manufacture a multipoint sensor to fit your needs.

Features

- Proven designs and custom engineering
- Small Diameter | 1/4" OD sheath designs with 30 temperature points
| 3/16" OD sheath designs with 20 temperature points
- Independently Isolated Sensors for on site replacement
- Optional secondary seals for the utmost in sealing integrity and safety
- Pipewells | Guide tubes with heat transfer blocks
| Positive contact bundles with springs
- Non-linear designs available

Applications

Refining	Hydrocrackers Hydrotreaters Distillation Columns Tanks
Chemical	Catalytic Reactors Fluidized Beds Multiphase Reactors Pilot Plants
Power	Duct Temperature Profiles
Bio Pharma	Labs Reactor Profiles Industrial Gases
